Technical Skills Java, Data Structures and Algorithm, UI/UX Designing, React JS, Node.js, Python, Express
Soft Skills Critical Thinking, Strong Communication, Team Leadership

EXPERIENCE

UI/UX Designer and Front End Developer June 2023 - Present
WictroniX *WFH*

- Provide design improvements to the developer.
- Check the UI/UX fundamentals to see how the app functions and how the user interacts with it.
- Figma, Sketch, as well as other design software like Photoshop and Illustrator, were used to create designs.

Web Developer Aug 2018 - Present
Freelancing *WFH*

- I have Designed numerous websites and mobile applications for people all throughout India.
- Used Figma and Sketch to design the websites, as well as front-end technologies like React and Next js, to construct the websites.

PROJECTS

Movie Search . The user can search films using this web application and view their ratings, cast, and trailers. It is developed with tools like Vite React and employs a variety of react libraries, including Redux Toolkit, React Redux, Axios, React Router Dom, and others, along with that styled the website using SASS. ([Try it here](#))

SeedFuel . This website, which is based on React, helps entrepreneurs with social causes generate money through crowdfunding and enables startups to find investors. I have also applied for a patent. ([Try it here](#))

Portfolio . The website for this portfolio is built using vite in React js, tailwind css for styling, and framer motion for animation. ([Try it here](#))

AWARDS AND ACHEIVEMENT

- Service Patent for SeedFuel Website
- Software Testing, Swayam
- Foundations of User Experience (UX) Design, Google
- Creative and Critical Thinking, Linkedin Learning
- UI/UX Design Training, Internshala
